Dark dot unique shoot' em up lyrics

Open the Mac App Store to buy and download apps. Greetings to all! I'm Kiing!!! I'm the darkest terror and I'm ready to go against the Elementals!!! This! Is! Dark dot!!!! * Clears the throat * First, let me tell you what Dark Dot is... FORMATION BASED ACTION SHOOT' EM UPDark Dot is a vertical scrolling action shooter that allows you to design and manipulate your own army of Darklets using formations. DRAW, RESIZE & ROTATEYou can design, resize and rotate to handle the formation of your army and shoot down everyone who would stand in your way. [Cue bad laughter] • Draw any shape - A circle, square, a cat or a unicorn• Resize - Shrink your formation to focus the fire or expand to spread the shooting formation• Rotate - Maneuver around obstacles or avoid projectiles! Do it like a pro! STORY MODE: OVER 100 LEVELSPlay through over a hundred levels and take on the Elemental Worldsi OVER 80 UNIQUE DARKLETSCollect and upgrade or evolve over 80 unique Darklets, each with their own skills and power. Take special Darklets like Pandarklet and Azure Dragon Darklet and watch them lead your army to victory. Release elemental forcesThere are 9 elemental types of Darklet that you can equip in your team, each with different power motion• Dark - shoots projectiles with moderate range• Air - shoots tracking projectiles• Electric - shoots electricity flowing from Darklet to Darklet, destroying everything that passes through; and blocks projectile enemies• Mud - shoots projectiles with moderate range, and prevents projectile enemies• Water - shoots projectiles that flies over obstacles, and lands in a stable area for a concentrated attack • Ice - shoots ice fragments that ricochet, and breaks into smaller fragments against the first contactENDLESS MODE & MORE• Endless Mode -- Top the leaderboards and show 'em who's the king!• Powered Boss Mode -- Daily Boss Fights with Great Rewards• Daily Loop Runs -- Gather rare resources and level up your team! Drive your darklets and conquer the world!!! SUPPORT If you're having problems, send us a message support@inzenstudio.com! We'll send help as soon as possible! The game is really well done and has a fun story that really gets you hooked. After completing the first world they ask you to pay for the rest of the game. Which I don't think is a bad thing, considering the work they put in to create the game. But if you don't want to pay a little money to play this game, then it may not be for you. Awesome game and I like that it's not some ad full of trash trying to squeeze every penny out of you. Especially love the fact that there is a demo, download and try to first world for free and just buy the game if you like. There are no more IAPs, no ads and no other greedy engineers. Never even tap into free games on the AppStore, much rather pay for a game game Be able to enjoy it instead of having to spend money every five minutes to continue playing the free game. Plus, premium games are usually better made games with more attention to detail and real mechanics to progress, rather than just giving more money to move on or wait a few hours/days. I accidentally tapped this and noticed it was a premium game with a demo before you buy, glad it happened or I would have missed it. Thanks devs for not trying to squeeze my wallet dry. I love the game and enjoy the game and you have to pay \$2.99 when asked for time in the game as honestly not so much you like almost \$3 to get bag chips and a drink at the gas station, as stop acting ask like \$20 for the full game hahah Sidenote: For all those reluctant to pay that there is no reason to rate it lower because you do not want to pay because the game itself is fun and low score do not allow the creator to build enough attraction to make a free to play the game as frankly sometimes game creators put a lot of money and hours into a game and have to do it back to continue updating the game etc. So don't rate lower because you don't want to pay for it!
